1 Introduction

biblatex-sbl provides support to biblatex and LaTeX for citations, bibliography, and a list of abbreviations in the style recommended by the Society of Biblical Literature (SBL). The style conforms to the second edition of the *SBLHS*.

The style supports all examples given in the handbook (see biblatex-sbl-test.pdf). Shorthand citations and a list of abbreviations containing journals, series, and shorthands are handled automatically. Repeated authors in the bibliography are replaced by a horizontal line. *Ibidem* is supported, but not enabled by default. Only note style citations, not Author-Date citations are supported. Primary sources can be cited in parentheses. biblatex-sbl is compatible with biblatex's support for hyperref.

For anything not covered in this manual, please see the biblatex documentation. Bugs and feature requests can be submitted at <https://github.com/dcpurton/biblatex-sbl/>.

2 Requirements

biblatex-sbl requires at least version 3.0 of biblatex and the xparse package. biber must be used. bibtex is not supported. For localization babel and csquotes are recommended.

3 Usage

The following minimal example will set up biblatex-sbl to conform to the defaults of the *SBLHS*.

```

\documentclass{article}
\usepackage[style=sbl,backend=biber]{biblatex}
\addbibresource{<bibfile.bib>}
\begin{document}
\printbiblist{abbreviations}
\printbibliography
\end{document}

```

3.1 Localization

By default biblatex-sbl uses American style punctuation and quotation marks. You can choose a different style by including the babel and csquotes packages in your document preamble. e.g.,

```

\usepackage[german]{babel}
\usepackage{csquotes}
\usepackage[style=sbl,backend=biber]{biblatex}

```

Currently english (including variants such as british, australian, etc.), spanish, and german are supported.

3.2 Commands

The standard commands for biblatex-sbl generally follow those defined by biblatex. Included below are the most typical commands. For more commands and options, reference the biblatex manual.

`\autocite[<prenote>][<altpostnote>|<postnote>]{<key>}`

`\autocite` inserts a citation as a footnote. It works as in the standard biblatex styles, except that that postnote argument can be divided into two using the pipe (|) character. This creates an altpostnote field which is used in some of the examples from §6.4 of the *SBLHS*. e.g.,

```

\autocite[See][1.3|8:223]{clementinehomilies}
1. See The Clementine Homilies 1.3 (ANF 8:223).

```

To use only altpostnote you must still include the pipe character. e.g.,

```
\autocite[III. 1-164|]{PGM:betz}
```

1. *PGM* III. 1–164 (Betz).

```
\cite[⟨prenote⟩][⟨altpostnote⟩|⟨postnote⟩]{⟨key⟩}
```

`\cite` works in the same way as `\autocite` except that the citation is placed directly into the text instead of in a footnote.

```
\parencite[⟨prenote⟩][⟨altpostnote⟩|⟨postnote⟩]{⟨key⟩}
```

`\parencite` works in the same way as `\autocite` except that the citation is placed inside parentheses instead of in a footnote. This is most useful for citing primary sources. e.g.,

```
\parencite[2.233-235]{josephus:ant}
```

(Josephus, *Ant.* 2.233–235)

```
\journalcite{⟨key⟩}
```

```
\seriescite{⟨key⟩}
```

```
\shorthandcite{⟨key⟩}
```

`\journalcite`, `\seriescite`, and `\shorthandcite` inserts the respective abbreviation into the text and also adds it to the list of abbreviations. The abbreviation is hyperlinked to the list of abbreviations if the `hyperref` package is loaded.

These commands ignore the `prenote` and `postnote` fields, so can safely be used anywhere within a database entry.

```
\printbiblist
```

This command prints a bibliography list. In `biblatex-sbl` all abbreviations (journals, series, and shorthands) can be printed using the following command:

```
\printbiblist[...]{abbreviations}
```

See the `biblatex` manual for an explanation of available optional arguments.

```
\printbibliography
```

Inserts the bibliography. See the `biblatex` manual for an explanation of available optional arguments.

3.3 Package Options

`biblatex-sbl` defaults to the recommendations of the [SBL](#), but it also supports many of the standard options from `biblatex` as well as a few custom ones outlined below.

`ibidtracker=true, false`

default: `false`

This option controls the *ibidem* tracker. The possible choices are:

`true` Enable the tracker: *ibid.* will be used.

`false` Disable the tracker: *ibid.* will not be used.

`citepages=sbl, permit, omit, separate`

default: `sbl`

Use this option to fine-tune the formatting of the pages field the first time an entry is cited.

`sbl` The postnote field is not printed for first citations. e.g.,

```
\autocite[159]{leyerle:1993}
```

1. Blake Leyerle, “John Chrysostom on the Gaze,” *JECS* 1 (1993): 159–74.

```
\autocite[159]{leyerle:1993}
```

2. Leyerle, “*Chrysostom*,” 159.

```
\autocite{leyerle:1993}
```

3. Leyerle, “*Chrysostom*,” 159–74.

If postnote is not a page range, then it is printed in parentheses after pages. e.g.,

```
\autocite[a note]{irvine:2014}
```

1. Stuart A. Irvine, “Idols [*ktbwnm*]: A note on Hosea 13:2a,” *JBL* 133 (2014): 509–17 (a note).

```
\autocite[a note]{irvine:2014}
```

2. Irvine, “*Idols [ktbwnm]*,” 509–17 (a note).

`permit`

The postnote is printed in parentheses after the pages field. e.g.,

```
\autocite[245]{wildberger:1965}
```

1. Hans Wildberger, “Das Abbild Gottes: Gen 1:26–30,” *TZ* 21 (1965): 245–59, 481–501 (245).

```
\autocite[245]{wildberger:1965}
```

2. Wildberger, “*Das Abbild Gottes*,” 245.

If postnote is not a page range, then pages is printed for subsequent citations, and the postnote is printed in parentheses. e.g.,

```
\autocite[a note]{wildberger:1965}
```

3. Wildberger, “Das Abbild Gottes,” 245–59, 481–501 (a note).

omit

The pages field is not printed unless postnote is empty or not a page range. e.g.,

```
\autocite[5]{freedman:1977}
```

1. David Noel Freedman, “Pottery, Poetry, and Prophecy: An Essay on Biblical Poetry,” *JBL* 96 (1977): 5.

```
\autocite[5]{freedman:1977}
```

2. Freedman, “Pottery, Poetry, and Prophecy,” 5.

```
\autocite{freedman:1977}
```

3. Freedman, “Pottery, Poetry, and Prophecy,” 5–26.

```
\autocite[a note]{freedman:1977}
```

4. Freedman, “Pottery, Poetry, and Prophecy,” 5–26 (a note).

separate

The postnote is printed in parentheses after the pages field preceeded by the bibliography string thiscite. e.g.,

```
\autocite[1]{petersen:1988}
```

1. David L. Petersen, “Hebrew Bible Textbooks: A Review Article,” *CRBR* 1 (1988): 1–18 (esp. 1).

```
\autocite[1]{petersen:1988}
```

2. Petersen, “Hebrew Bible Textbooks,” 1.

If postnote is not a page range, then firstcite is not used. e.g.,

```
\autocite[a note]{leyerle:1993}
```

3. Leyerle, “Chrysostom,” 159–74 (a note).

fullbibrefs=true, false

default: false

The *Student Supplement for the SBLHS* permits two styles for the bibliography entry for Bible dictionaries and encyclopaedias, and multivolume commentaries for the entire Bible by multiple authors.¹

This option applies to @inreference and @incommentary entry types.

true

The bibliography entry is printed in long form. e.g.,

1. *Student Supplement for the SBL Handbook of Style, Second Edition*, compiled by Melanie Greer Nogalski et al., ed. Joel M. LeMon and Brennan W. Breed (Atlanta, GA: SBL Press, February 2015), <https://www.sbl-site.org/assets/pdfs/pubs/SBLHSupp2015-02.pdf>, 4–5.

Stendahl, Krister. “Biblical Theology, Contemporary.” Pages 418–32 in vol. 1 of *The Interpreter’s Dictionary of the Bible*. Edited by George A. Buttrick. 4 vols. New York: Abingdon, 1962.

false

The bibliography entry is printed in a short form. e.g.,

Stendahl, Krister. “Biblical Theology, Contemporary.” *IDB* 1:418–32.

`ibidpage=true, false`

default: false

The scholarly abbreviation *ibidem* is sometimes taken to mean both ‘same author + same title’ and ‘same author + same title + same page’ in traditional citation schemes. By default, this is not the case with this style because it may lead to ambiguous citations. If you prefer the wider interpretation of *ibidem*, set the package option `ibidpage=true` or simply `ibidpage` in the preamble. The default setting is `ibidpage=false`.

`releasedate=year, short, long, terse, comp, iso8601`

default: comp

Similar to the `date` option (see the `biblatex` manual) but controls the format of the `releasedate`.

`sblfootnotes=true, false`

default: true

This option controls the style of footnotes.

true

Footnotes are printed with a normal number followed by a period and the first line indented:

1. Charles H. Talbert, *Reading John: A Literary and Theological Commentary on the Fourth Gospel and the Johannine Epistles* (New York: Crossroad, 1992).

false

Footnotes are printed with a superscript (or whatever other default has been set up by your style):

¹James M. Robinson and Helmut Koester, *Trajectories through Early Christianity* (Philadelphia: Fortress, 1971).

4 Database Guide

4.1 Entry Types

This section gives an overview of the entry types supported by `biblatex-sbl`. Many work in the same way as `biblatex`. Some standard entry types have custom usage, and some are unique to `biblatex-sbl`. These are documented more fully.

ancienttext This is a custom type for biblatex-sbl. It is used for the special examples in [SBLHS](#) §6.4.1, §6.4.3 and §6.4.8.

Unless `options = {skipbib=false}` is set explicitly, a `@ancienttext` entry will not appear in the bibliography. (Although, see `ANRW` `entrysubtype` below for an exception.) The `sblxref` field is used to refer to the entry which should appear in the bibliography instead of the `@ancienttext` entry.

The entry pointed to by `sblxref` along with the `postnote` is printed in parentheses after the `altpostnote`, `editor`, and `translator` fields they are present. `translator` and `editor` fields are omitted for subsequent citations. e.g.,

```
\autocite[319]{suppiluliumas}
1. "Suppiluliumas and the Egyptian Queen," trans. Albrecht Goetz (ANET, 319).
2. "Suppiluliumas and the Egyptian Queen" (ANET, 319).
\printbibliography
Pritchard, James B., ed. Ancient Near Eastern Texts Relating to the Old Testament. 3rd ed.
Princeton: Princeton University Press, 1969.
```

If the entry contains `options = {skipbib=false}`, then the bibliography entry will be like `@book`. Any shorthand is also printed in the same way as a `@book` shorthand.

The following values for the `entrysubtype` field are supported:

ANRW The `ANRW` `entrysubtype` is particularly for citing [ANRW](#) as outlined in §6.4.8 of the [SBLHS](#). In this case, the entry *will* appear in the bibliography. See `biblatex-sbl-test.pdf` for full details of the required database entry.

chronicle Formats the title using an upright shape font without quotation marks. e.g.,

```
\autocite[lines 3--4|125]{esarhaddonchronicle}
1. Esarhaddon Chronicle, lines 3–4 (Albert Kirk Grayson, Assyrian and Babylonian Chronicles, TCS 5 [Locust Valley, NY: Augustin, 1975], 125).
```

COS Suppresses parentheses around `COS` and the `postnote` for subsequent citations. e.g.,

```
\autocite{greathymnaten}
1. "The Great Hymn to the Aten," trans. Miriam Lichtheim (COS 1.26:44–46).
2. "Great Hymn to the Aten," COS 1.26:44–46.
```

inscription Similarly to `chronicle`, this formats the title using an upright shape font without quotation marks.

- article** An article in a journal or magazine. Also use this type for review articles (*SBLHS* §6.3.4) and electronic journal articles (*SBLHS* §6.3.10).
- book** A single-volume book with one or more authors.
- mvbook** A multivolume @book. biblatex-sbl treats this as an alias for @book.
There is one entrysubtype supported:
- RIMA** The citation for *RIMA* (*SBLHS*, 97) is treated like a series with a number when cited in full, but as a shorthand with a volume when cited in short form. See `biblatex-sbl-test.pdf` for full details.
- inbook** A part of a book which forms a self-contained unit with its own title. biblatex-sbl treats this as an alias for @incollection.
- bookinbook** This type is similar to @inbook but intended for works originally published as a stand-alone book. The main difference is that the title is printed in italics instead of in quotation marks. See §6.4.4 in `biblatex-sbl-test.pdf` for an example.
- suppbook** Supplemental material in a @book. Use this for an introduction, preface or foreword written by someone other than the author (*SBLHS* §6.2.14). The type field is used to specify the type of supplementary material. See §6.2.14 of `biblatex-sbl-test.pdf`.
- classictext** This type is a custom type for biblatex-sbl. It is used for the special examples in *SBLHS* §6.4.2 and §§6.4.4–6.
Unless options = {skipbib=false} is set explicitly, a @classictext entry will not appear in the bibliography. The sblxref field is used to refer to the entry which should appear in the bibliography instead of the @classictext entry.
If present, the translator and series are printed in parentheses following the postnote. e.g.,

```
\autocite[15.18-19]{tacitus:ann:jackson}
1. Tacitus, Ann. 15.18–19 (Jackson, LCL).
\printbibliography
Tacitus. The Histories and The Annals. Translated by Clifford H. Moore and John Jackson.
4 vols. LCL. Cambridge: Harvard University Press, 1937.
```

If the entry contains options = {skipbib=false}, then the bibliography entry will be like @incollection except that the title is set in italics instead of within quotation marks.

The following values for the entrysubtype field are supported:

churchfather Entries using the churchfather entrysubtype print the entry pointed to by sblxref within parentheses following the altpostnote. The postnote field applies to the entry in sblxref. altpostnote is always separated from the title by a space.

```
\autocite[28.3.5|252]{augustine:letters}
1. Augustine, Letters of St. Augustin 28.3.5 (NPNF1 1:252).
\printbibliography
Augustine. The Letters of St. Augustin. In vol. 1 of The Nicene and Post-Nicene Fathers, Series 1. Edited by Philip Schaff. 14 vols. 1886–1889. Repr., Peabody, MA: Hendrickson, 1994.
```

collection A single-volume collection with multiple, self-contained contributions by distinct authors which have their own title. The work as a whole has no overall author but it will usually have an editor. biblatex-sbl treats this as an alias for @book.

mvcollection A multi-volume @collection. biblatex-sbl treats this as an alias for @mvbook.

incollection A contribution to a collection which forms a self-contained unit with a distinct author and title.

commentary A single-volume commentary on a book (or part of a book) of the Bible by one or more authors. This entry type is similar to @book, except that any volume and maintitle is only printed in the bibliography, not the citation.

mvcommentary A multi-volume commentary on a single book of the Bible by one or more authors or a multi-volume commentary on the whole Bible by multiple authors. biblatex-sbl treats this as an alias to @mvbook.

incommentary A contribution to a commentary which forms a self-contained unit with a distinct author and title. This is typically a commentary on a book of the Bible appearing in a single or multi-volume commentary on the entire Bible.

If an entry contains an sblxref field, then the bibliography entry is printed in either short or long form as described above under fullbibrefs. Otherwise this entry is treated as an alias for @incollection.

lexicon A single-volume lexicon or theological dictionary. biblatex-sbl treats this as an alias for @book.

mvlexicon A multi-volume lexicon or theological dictionary. biblatex treats this as an alias for @mvbook.

inlexicon An article in a lexicon or theological dictionary. This is a custom type for biblatex-sbl. The required sblxref must contain the entry name of a @lexicon or @mvlexicon. The

@inlexicon entry does not appear in the bibliography. Instead the lexicon pointed to by sblxref appears in the bibliography.

Subsequent citations do not include the article title, only the name of the lexicon. e.g.,

```
\autocite[511]{dahn+liefeld:see+vision+eye}
1. Karl Dahn and Walter L. Liefeld, "See, Vision, Eye," NIDNTT 3:511–21.
\autocite[511]{dahn+liefeld:see+vision+eye}
2. Dahn and Liefeld, NIDNTT 3:511.
\printbibliography
Brown, Colin, ed. New International Dictionary of New Testament Theology. 4 vols. Grand Rapids: Zondervan, 1975–1985.
```

manual Technical or other documentation, not necessarily in printed form. biblatex-sbl treats this as an alias for @book.

misc A fallback type for entries which do not fit into any other category. Use the howpublished field to supply publishing information in free format, if applicable.

This type is also set up to be able to insert an item into the list of abbreviations. So it is permissible to include just journaltitle and shortjournal or series and shortseries, or shorthand and relevant fields. In this case ensure that options = {skipbib} is set.

online An online resource without a print counterpart. biblatex-sbl treats this as an alias for @article.

proceedings A single-volume conference proceedings. This type is not fully supported. biblatex-sbl treats this as an alias for @collection.

mvproceedings A multi-volume @proceedings entry. This type is not fully supported. biblatex-sbl treats this as an alias for @mvcollection.

inproceedings An article in a conference proceedings. This type is not fully supported. biblatex-sbl treats this as an alias for @incollection.

reference A single-volume encyclopaedia or dictionary. biblatex-sbl treats this as an alias for @book.

mvreference A multi-volume @reference. biblatex-sbl treats this as an alias for @@mvbook.

inreference An article in an encyclopaedia or dictionary. The required sblxref field must contain the entry name of a @reference or @mvreference.

The bibliography entry is printed in either short or long form as described above under fullbibrefs.

- review** A book review in a journal. This is similar to the `@article` entry type. Use the `revdauthor`/`revdeditor` and `revdttitle` fields to specify the author/editor and title of the book being reviewed.
- Note that review articles are treated like articles and should use the `@article` entry type.
- seminarpaper** An [SBL](#) seminar paper. This is a custom entry type for `biblatex-sbl`. See §6.4.11 of `biblatex-sbl-test` for an example.
- set** An entry set. This entry type is special. See the `biblatex` manual for details.
- thesis** A unpublished thesis written for an educational institution to satisfy the requirements for a degree. Use the `type` field to specify the type of thesis and the `institution` to specify the educational institution.
- unpublished** A work with an author and a title which has not been formally published, such as a manuscript or the script of a talk. Use the fields `howpublished` and `note` to supply additional information in free format, if applicable.
- See §6.3.8 of `biblatex-sbl-test` for an example.

4.2 Entry Fields

`biblatex-sbl` supports many of the entry fields outlined in the `biblatex` manual. There are also a number of custom entry fields supported by `biblatex-sbl`. These are documented below.

- bookeditor** list (name)
- The editor(s) of the `booktitle`.
- booktranslator** list (name)
- The translator(s) of the `booktitle`.
- maineditor** list (name)
- The editor(s) of the `maintitle`.
- maintranslator** list (name)
- The translator(s) of the `maintitle`.
- releasedate** field (date)
- The date a text edition published online with no print counterpart is released. See §6.4.13 of `biblatex-sbl-test.pdf`.

<code>releaseday</code>	field (datepart)	This field holds the day component of the <code>releasedate</code> field.
<code>releasemonth</code>	field (datepart)	This field holds the month component of the <code>releasedate</code> field.
<code>releaseyear</code>	field (datepart)	This field holds the year component of the <code>releasedate</code> field.
<code>revdauthor</code>	list (name)	The author(s) of the <code>revdtitle</code> .
<code>revdeditor</code>	list (name)	The editor(s) of the <code>revdtitle</code> .
<code>revdshorttitle</code>	field (literal)	The title of a book being review in an abridged form. This field is used in subsequent citations of <code>@review</code> entry types.
<code>revdsubtitle</code>	field (literal)	The subtitle of a book being reviewed.
<code>revdtitle</code>	field (literal)	The title of a book being reviewed.
<code>revdtitleaddon</code>	field (literal)	An annex to the <code>revdtitle</code> , to be printed in a different font.
<code>revdtranslator</code>	list (name)	The translator(s) of the <code>revdtitle</code> .
<code>sblxref</code>	field (entry key)	<p>This is a special cross-reference field. Unlike <code>crossref</code> and <code>xref</code>, the parent entry will <i>always</i> appear in the bibliography and (if applicable) the list of abbreviations regardless of the value of <code>mincrossrefs</code>. Neither does the child entry inherit any fields from the parent. It is used when what appears in the citation is radically different to what appears in the bibliography.</p> <p>It's appearance in the bibliography and list of abbreviations can be controlled using the entry options <code>skipbib</code>, <code>skipbiblist</code>, <code>skipbiblistshorthand</code>, and <code>skipbiblistseries</code>. See below for details of these options.</p>

`series` field (literal)

This field is used when a series is begun anew to distinguish between the old and new series. See [SBLHS §6.2.24](#).

`shortbooktitle` field (literal)

The `booktitle` in abridged form.

`shortmaintitle` field (literal)

The `maintitle` in abridged form.

`withauthor` list (name)

The author(s) who assist the author. See `witheditortype`, below, for an example.

`withauthortype` field (literal)

The type of `withauthor`. This field will affect the string used to introduce the author(s) who assist the author. If unspecified, the bibliography string `with` is used.

`witheditor` list (name)

The editor(s) who assist the editor.

`witheditortype` field (literal)

The type of `witheditor`. This field will affect the string used to introduce the editor(s) who assist the editor. If unspecified, the bibliography string `with` is used.

```
\autocite[1:24]{TLOT}
```

```
1. TLOT 1:24.
```

```
\printbibliography
```

```
Jenni, Ernst, ed., with assistance from Claus Westermann. Theological Lexicon of the Old Testament. Translated by Mark E. Biddle. 3 vols. Peabody, MA: Hendrickson, 1997.
```

```
\printbiblist{abbreviations}
```

```
TLOT            Theological Lexicon of the Old Testament. Edited by Ernst Jenni, with assistance from Claus Westermann. Translated by Mark E. Biddle. 3 vols. Peabody, MA: Hendrickson, 1997
```

`withtranslator` list (name)

The translator(s) who assist the translator.

<code>withtranslortype</code>	field (literal)	The type of <code>withtranslator</code> . This field will affect the string used to introduce the translator(s) who assist the translator. If unspecified, the bibliography string <code>with</code> is used.
<code>withbookauthor</code>	list (name)	The author(s) who assist the <code>bookauthor</code> .
<code>withbookauthortype</code>	field (literal)	This field is analogous to the <code>withauthortype</code> , but for the <code>bookauthor</code> .
<code>withbookeditor</code>	list (name)	The editor(s) who assist the <code>bookeditor</code> .
<code>withbookeditortype</code>	field (literal)	This field is analogous to the <code>witheditortype</code> , but for the <code>bookeditor</code> .
<code>withbooktranslator</code>	list (name)	The translator(s) who assist the <code>booktranslator</code> .
<code>withbooktranslortype</code>	field (literal)	This field is analogous to the <code>withtranslortype</code> , but for the <code>booktranslator</code> .
<code>withmainauthor</code>	list (name)	The author(s) who assist the <code>mainauthor</code> .
<code>withmainauthortype</code>	field (literal)	This field is analogous to the <code>withauthortype</code> , but for the <code>mainauthor</code> .
<code>withmaineditor</code>	list (name)	The editor(s) who assist the <code>maineditor</code> .
<code>withmaineditortype</code>	field (literal)	This field is analogous to the <code>witheditortype</code> , but for the <code>maineditor</code> .
<code>withmaintranslator</code>	list (name)	The translator(s) who assist the <code>maintranslator</code> .
<code>withmaintranslortype</code>	field (literal)	This field is analogous to the <code>withtranslortype</code> , but for the <code>maintranslator</code> .

4.3 Entry Options

`biblatex-sbl` supports many of the entry options outlined in the `biblatex` manual. There are also a number of custom entry options supported by `biblatex-sbl`. These are documented below.

`firstcitenoshorthand=true, false` default: false

This option controls the first citation of entries with a shorthand field. The possible choices are:

- `true` Do not use the shorthand the first time an entry is cited. The entry is cited in full as it would be if no shorthand was present.
- `false` Always use the shorthand when citing the entry.

`nolongcite=true, false` default: false

This option controls the format of the first citation. The possible choices are:

- `true` Always use the short subsequent citation format, even the first time an entry is cited. In effect this sets `\citeseen` to true for the first citation.
- `false` Use a full citation the first time an entry is cited and a short citation for subsequent citations.

`shortciteauthor=true, false` default: false

This option controls the format of subsequent citations. The possible choices are:

- `true` Suppress the shorttitle or title in subsequent citations, so only the author(s) or editor(s) are printed.
- `false` Include the shorttitle or title in subsequent citations.

`skipbiblistshorthand=true, false` default: false

This option controls what appears in the list of abbreviations for database entries containing both a shorthand and a shortseries. For entries not containing a shortseries just use the option `skipbiblist`. The possible options are:

- `true` Do not include the shorthand in the list of abbreviations.
- `false` Include the shorthand in the list of abbreviations.

`skipbiblistshortseries=true, false` default: false

This option controls what appears in the list of abbreviations for database entries containing both a shorthand and a shortseries. For entries not containing a shorthand just use the option `skipbiblist`. The possible options are:

- `true` Do not include the shortseries in the list of abbreviations.
- `false` Include the shortseries in the list of abbreviations.

4.4 Reprints

biblatex-sbl supports three different ways of doing reprints with varying complexity.

If only the original publisher, location, and/or year are required, then use the fields `origpublisher`, `origlocation`, and `origdate`. e.g.,

```
@book{vanseters:1997,  
  author = {Van Seters, John},  
  title = {In Search of History: Histeriography in the Ancient  
          World and the Origins of Biblical History},  
  origlocation = {New Haven},  
  origpublisher = {Yale University Press},  
  origdate = {1983},  
  location = {Winona Lake, IN},  
  publisher = {Eisenbrauns},

Van Seters, John. *In Search of History: Histeriography in the Ancient World and the Origins of Biblical History*. New Haven: Yale University Press, 1983. Repr., Winona Lake, IN: Eisenbrauns, 1997.

When extra information is required, use a related entry with `relatedtype = {reprint}`. A custom string can be specified instead of “Repr.” using the optional `relatedstring` field. In this case no punctuation is inserted after the `relatedstring`. You could think of the default being `relatedstring = {\bibstring{reprint}},` e.g.,

```
@mvbook{sasson:2000,  
  editor = {Sasson, Jack M.},  
  title = {Civilizations of the Ancient Near East},  
  volumes = {4},  
  location = {New York},  
  publisher = {Scribner's Sons},  
  year = {1995},  
  related = {sasson:repr},
```

```

        relatedtype = {reprint}
    }
    @mvbook{sasson:repr,
        volumes = {4~vols.\ in 2},
        location = {Peabody, MA},
        publisher = {Hendrickson},
        date = {2000}
    }

```

```
\autocite[1:40]{sasson:2000}
```

1. Jack M. Sasson, ed., *Civilizations of the Ancient Near East*, 4 vols. (New York: Scribner's Sons, 1995; repr., 4 vols. in 2 [Peabody, MA: Hendrickson, 2000]), 1:40.

```
\printbibliography
```

Sasson, Jack M., ed. *Civilizations of the Ancient Near East*. 4 vols. New York: Scribner's Sons, 1995. Repr., 4 vols. in 2. Peabody, MA: Hendrickson, 2000.

A full reprint history also uses the `related` field, but with some other `relatedtype` apart from `relatedtype = {reprint}`. e.g.,

```

@book{wellhausen:1883,
    author = {Wellhausen, Julius},
    title = {Prolegomena zur Geschichte Israels},
    edition = {2},
    location = {Berlin},
    publisher = {Reimer},
    date = {1883}
}
@book{wellhausen:1885,
    author = {Wellhausen, Julius},
    title = {Prolegomena to the History of Israel},
    translator = {Black, J. Sutherland and Enzies, A.},
    preface = {Smith, W. Robertson},
    location = {Edinburgh},
    publisher = {Black},
    related = {wellhausen:1883},
    relatedtype = {translationof},
    date = {1885}
}

```

```
@book{wellhausen:1957,
  author = {Wellhausen, Julius},
  title = {Prolegomena to the History of Ancient Israel},
  location = {New York},
  publisher = {Meridian Books},
  related = {wellhausen:1885},
  relatedtype = {reprintof},
  date = {1957}
}
```

```
\autocite[20]{wellhausen:1957}
```
